

## RedCat SmartFinance

*Leave the number crunching to us!*

SmartFinance from RedCat is a comprehensive accounting and financial management module that is tailored to the unique requirements of hospitality businesses, offering all the reports you could possibly need.

This intuitive system is fully integrated with the suite of hospitality management solutions RedCat offers. The result? Most of the data processing is seamlessly taken care of by one of the other RedCat modules. You can drastically reduce your data entry time and eliminate double entries.

The RedCat SmartFinance module allows you to pay your suppliers and employees via Internet banking, as well as manage inventory through with a recipe and yield costing functionality when used in conjunction with RedCat SmartStock. It also offers a quoting module for client functions.

Other features include; GST compliance and BAS reporting, a customisable general ledger, accounts payable and receivable functionality, a bank reconciliation and cheque printing facility, and an extensive and comprehensive financial reporting module.

Keeping track of your business's finances has never been easier.
