

RedCat SmartStock

Keep track what you have and what you don't have, what you need and what you don't need.

SmartStock is an innovative perpetual stock management system from RedCat that automatically calculates your stock levels and values, performs stocktakes, generates purchase orders and manages your recipe and functions costings. SmartStock can even optionally manage your multi-departmental or multi-site operations, and offers genuine bottom line benefits by taking away the need to undertake time consuming physical inventory audits. You can also swiftly identify wastage, theft and losses.

Transfer stock between departments and sites, identify your current PAR levels and undertake stock ordering with ease. SmartStock also flags changes in supplier costs to ensure that your average costs are always up to date.

Seamlessly integrate SmartStock with the RedCat SmartPOS and SmartFinance modules to reduce the time and effort needed to stay in control of your business affairs.
